SUMMARY

I am a business analyst with experience in machine learning, database management, and front-end and back-end separation development. I am also proficient in the statistical programming language R, capable of performing statistical and business analyses on datasets. I am skilled in using various tools such as Python, R, Java, HTML, SQL, and have a good command of office software. I possess excellent problem-solving abilities in business activities, strong coordination in team collaboration, and outstanding learning abilities. I am cheerful and friendly, eager to create more value.

TECHNICAL SKILLS

Programming Languages: Python, R, SQL, Java, HTML

Libraries & Tools: NumPy, Pandas, Scikit-learn

PROJECTS

Video Game Dataset Analysis

Machine Learning Project

Mar 2025 – Jun 2025

Python, SQL, Excel

- Trained and deployed ML models on structured datasets to generate predictive analytics
- Complete dataset preprocessing and feature matching
- Complete the matching optimization of data and models based on business needs, and create a visual report

Teacher Information Management System

Natural Language Processing

Jul 2023 – May 2024

Java, Spring, Hibernate, MySQL, HTML, CSS, JavaScript

- Built a RESTful API for sentiment analysis of text data
- Used HTML, CSS and JavaScript for the frontend
- Built backend with Java and Spring framework

EXPERIENCE

Development Engineer

Beijing Zhongke Hengye Technology Co., Ltd. – Full-time

Jul 2023 – May 2024

Beijing, China

- Implemented database operations using MySQL and Hibernate
- Developed using B/S architecture:
Frontend: HTML, CSS, JavaScript
Backend: Java with Spring framework
- Developed an online approval module for teacher transfers using RESTful APIs

EDUCATION

University of Auckland, Uoa

B.S. in Business Analytics

Auckland, NZ

Jul 2022 – Nov 2025
